UJTL
CJCSI

Joint Staff J7
Mr. Chris Reams

25-27 April 2006

Purpose…

- **The UJTL is a CJCSM**
  - **Not truly directive in nature**
  - **Serves well for it's purposes, but not a policy document**
  - **Cannot be enforced in the same manner as an instruction**
- **There is a need for a CJCSI to direct policy, procedures, and responsibilities for the UJTL**
  - **Rapidly changing environment of Joint Capability Areas, Defense Readiness Reporting System and Lessons Learned require a structure under which the UJTL operates**
  - **Clearly defined policies for use of the UJTL need to be written**

Joint Capability Areas…

- **Joint Capability Areas have the potential to radically change the landscape of the UJTL**
  - **Could lead to a whole new taxonomy**
- **The UJTL must be preserved in a form that is useful to the COCOMS and CSAs for Training and Readiness, while remaining flexible enough to serve as the basis for new uses (i.e. Lessons Learned, Acquisition, etc.)**
  - **A directive can delineate the proper purpose and intent of the UJTL.**
  - **Frees CJCSM to contain only tasks conditions and measures**

Directive issues

- A new CJCSI requires input from the UJTL user-community
- Strawman currently written and awaiting input

Current Issues addressed in draft...

- Purpose of the UJTL
- Guidelines for task usage in development of JMETL
- Policy for enforcement of CJCSM 3500.04D
- Joint Capability Areas Taxonomy and Lexicon

Discussion…

- Do we need a UJTL CJCSI?
- Are we on the right track?
- What other topics and issues do we need?

Summary

- Draft UJTL CJCSI is in strawman form now
- J-7 JTD is coordinating with J-7 JETCD on JCAs
- Draft CJCSI enforces policies and procedures currently in CJCSM 3500.04D
- Includes much of policy information in the CJCSM and now-defunct UJTL Requirements Document

- **Questions???**
